

PRODUCT SHEET - GAS FIRED CERAMIC INFRA RED HEATERS

The 3PIRB range of gas fired ceramic heaters are specially designed for industrial processes that require a uniform high intensity radiant heat source.

The modular medium wave emitters can be arranged to offer any size of emitter area required.

The simple heater design and the turret mixing system for the air and gas ensure a repeatable, safe and reliable system ideally suited to industrial applications.

- **Compact highly efficient heat source**
- **Quick heat up and cool down times**
- **Multiple rows & widths available**
- **Fully automated control**
- **Horizontal or vertical firing**
- **Fixed or modulating outputs**
- **Natural Gas, Propane or Butane**
- **Fully tested & pre-commissioned**

APPLICATIONS

- Pre Heating & Drying of Textiles
- Pre Gel for Impression Printing
- Heat Setting
- Synthetic Yarn Treatment
- Thermal Bonding
- Hot Flue Systems
- P. V. C. Coat Curing
- Foodstuffs Toasting & Branding
- Paint Drying and Curing
- Pre Gel for High Speed Drying
- Powder Coat Curing
- Anchour Coat Drying
