

INSTRUMENTATION

Proctor Process Plant has detailed knowledge and experience of a wide range of process instrumentation from controllers, profilers, recorders and data loggers to complex bespoke solutions. With our large range of stock and thorough understanding of a whole host of control solutions we can supply any quotation or technical assistance required.

In addition a full range of thermocouples, PT/RT sensors, extension cables and transmitters can also be supplied. All thermocouples can be individually made to suit the exact location and temperature range required.

- Controllers
- Valve Motor Drivers
- Valve Positioners
- Limits
- Profiler/Controllers
- Recorders
- Loggers
- Thermocouples
- Resistance Thermometers
- Transmitters
