

GAS FIRED CERAMIC INFRARED HEATERS

The 3PIRB range of gas fired ceramic heaters are specially designed for industrial processes that require a uniform high intensity radiant heat source.

The modular medium wave emitters can be arranged to offer any size of emitter area required.

The simple heater design and the turret mixing system for the air and gas ensure a repeatable, safe and reliable system, ideally suited to industrial applications.

- Compact highly efficient heat source
- Quick heat up and cool down times
- Multiple rows and widths available
- Fully automated control
- Horizontal or vertical firing
- Fixed or modulating outputs
- Natural Gas or LPG
- Fully tested, fired and pre-commissioned

PRODUCT APPLICATIONS

Pre Heating and Drying of Textiles
Pre Gel for Impression Printing
Heat Setting
Synthetic Yarn Treatment
Thermal Bonding
Hot Flue Systems
P.V.C. Coating Curing
Foodstuffs, Toasting and Branding
Paint Drying and Curing
Pre Heating for High Speed Drying
Powder Coat Curing
Anchor Coat Drying
Flame Proofing
