

HEAT EXCHANGERS

The 3PHE Range of heat exchangers are designed for thermal applications requiring clean process air that does not contain combustion products prone to damaging or contaminating the finished product.

Many variants are available for each heater to suit every requirement, from specialist materials, to custom designed airways.

Heat exchangers can be supplied either separately or with burner and ancillary equipment.

- Multiple options available
- High efficiency design
- Robust construction and reliability
- Simple installation and maintenance
- Re-circulating or single shot applications
- High temp applications available
- Heat capacities of 60kW to 1000kW+
- Multiple heat exchanger systems
- Natural Gas, LPG and oil firing

PRODUCT APPLICATIONS

Foodstuffs
Chemicals
Tobacco
Space Heating
Performance Coatings
Medical Applications
Spray Dryers
Paint Plants
All Indirect Fired Applications
